M31 Oxygen

Scope of Practice	EMR
Classification	• Gas
Usual Presentation	• Black color cylinder with white shoulder
Mechanism of Action	• Oxygen administration delivers supplemental oxygen to patients with low blood oxygen levels (hypoxemia) to improve tissue oxygenation and support vital organ function.
Indications	• Sp02 <94%
Contraindications	• Bleomycin lung injury
Precautions	• Administration to newborns.
Side Effects	• Prolonged use in COPD patients may lead to a reduction in ventilation stimulus
Adult Dose & Administration	• As determined by relevant CPG to maintain targeted oxygen levels.
Pediatric Dose & Administration	• As determined by relevant CPG to maintain targeted oxygen levels.
Use in Pregnancy and Lactation	• Pregnancy: Safe to use in pregnancy and should be administered when clinically indicated. • Lactation: Safe to use in lactation and should be administered when clinically indicated.
Additional Information	• Nil.
